PERSONAL STATEMENT

AI Engineer with 7+ years of experience in Machine Learning and Computer Vision, holding an MSc in Artificial Intelligence (with Distinction) from the University of Southampton. Experienced in developing and deploying deep learning solutions, with a strong focus on computer vision using PyTorch. Proven track record in developing and deploying end-to-end AI pipelines, medical imaging solutions, and large-scale computer vision systems. Skilled in model design, training, evaluation, and deployment on cloud platforms.

TECHNICAL SKILLS

- Languages & Libraries: Python, OpenCV, NumPy, Matplotlib
- Frameworks: PyTorch, TensorFlow, Claude Code
- Infrastructure: Docker, Git, Linux, AWS, GCP
- Specialities: Object detection, object segmentation, activity recognition, pose estimation, face identification, real-time inference
- Embedded Systems: Jetson Nano, Jetson Orin NX

WORK EXPERIENCE

AI/ML Engineer | Boon AI, San Mateo, CA (Remote from Bandung, Indonesia) **Jan 2026 to Present**

- **Developed Computer Vision models for automated take-off**, specialising in high-precision material quantification from construction blueprints.
- Architected end-to-end inference pipelines, integrating deep learning outputs into the core production platform to **automate manual estimation**.
- Accelerated the ML lifecycle by **leveraging AI-assisted programming** to streamline model training and deployment workflows.

AI Engineer | PT Riset Kecerdasan Buatan (riset.ai), Bandung, Indonesia **Aug 2017 to Sep 2024**

Lead Artificial Intelligence Engineer **Sep 2020 to Sep 2024**

- Designed and deployed **computer vision pipelines** for industrial and surveillance applications, integrating object detection, activity recognition, and tracking models for real-time analytics.
- Led a small team of engineers in model optimisation, dataset management (CVAT, Streamlit), and deployment using Docker.

Research Engineer **Mar 2020 to Sep 2020**

- **Developed medical imaging models** (U-Net, DenseNet) for COVID-19 detection and lung segmentation from X-rays.
- **Collaborated with medical professionals** to validate radiological findings and model accuracy.

Deep Learning Engineer **Aug 2017 to Mar 2020**

- Collected data, trained models, and optimised AI deployment scripts for real-world efficiency using AWS EC2.
- Developed an end-to-end **automatic license plate recognition** pipeline with 95% accuracy using CCTV camera feeds.
- Improved the accuracy of the **Indonesian face recognition** system from 80% to 95%.
- Built a working prototype for **automatic customer purchase tracking** using multiple 3D cameras.

EDUCATION

Master of Science (With Distinction): Artificial Intelligence
University of Southampton – Southampton, United Kingdom 2024 – 2025

Bachelor of Science: Electrical Engineering
Institut Teknologi Bandung – Bandung, Indonesia 2013 – 2017
